HILLARY CLINTON The question was about the Supreme Court. And I just want to quickly say, I respect the Second Amendment. But I believe there should be comprehensive background checks, and we should close the gun show loophole, and close the online loophole.

MODERATOR Thank you. We have— we have one more question, Mrs. Clinton.

HILLARY CLINTON We have to save as many lives as we possibly can.

MODERATOR We have one more question from Ken Bone about energy policy. Ken?

AUDIENCE What steps will your energy policy take to meet our energy needs, while at the same time remaining environmentally friendly and minimizing job loss for fossil power plant workers?

MODERATOR Mr. Trump, two minutes?

DONALD TRUMP Absolutely. I think its such a great question, because energy is under siege by the Obama administration. Under absolutely siege. The EPA, Environmental Protection Agency, is killing these energy companies. And foreign companies are now coming in buying our— buying so many of our different plants and then re- jiggering the plant so that they can take care of their oil. We are killing— absolutely killing our energy business in this country. Now, Im all for alternative forms of energy, including wind, including solar, et cetera. But we need much more than wind and solar. And you look at our miners. Hillary Clinton wants to put all the miners out of business. There is a thing called clean coal. Coal will last for 1, 000 years in this country. Now we have natural gas and so many other things because of technology. We have unbelievable— we have found over the last seven years, we have found tremendous wealth right under our feet. So good. Especially when you have \$20 trillion in debt. I will bring our energy companies back. Theyll be able to compete. Theyll make money. Theyll pay off our national debt. Theyll pay off our tremendous budget deficits, which are tremendous. But we are putting our energy companies out of business. We have to bring back our workers. You take a look at whats happening to steel and the cost of steel and China dumping vast amounts of steel all over the United States, which essentially is killing our steelworkers and our steel companies. We have to guard our energy companies. We have to make it possible. The EPA is so restrictive that they are putting our energy companies out of business. And all you have to do is go to a great place like West Virginia or places like Ohio, which is phenomenal, or places like Pennsylvania and you see what theyre doing to the people, miners and others in the energy business. Its a disgrace.

MODERATOR Your time is up. Thank you.

DONALD TRUMP Its an absolute disgrace.

MODERATOR Secretary Clinton, two minutes.
