HILLARY CLINTON Nine million people— nine million people lost their jobs. Five million people lost their homes. And \$13 trillion in family wealth was wiped out. Now, we have come back from that abyss. And it has not been easy. So were now on the precipice of having a potentially much better economy, but the last thing we need to do is to go back to the policies that failed us in the first place. Independent experts have looked at what Ive proposed and looked at what Donalds proposed, and basically theyve said this, that if his tax plan, which would blow up the debt by over \$5 trillion and would in some instances disadvantage middle- class families compared to the wealthy, were to go into effect, we would lose 3. 5 million jobs and maybe have another recession. Theyve looked at my plans and theyve said, ok, if we can do this, and I intend to get it done, we will have 10 million more new jobs, because we will be making investments where we can grow the economy. Take clean energy. Some country is going to be the clean- energy superpower of the 21st century. Donald thinks that climate change is a hoax perpetrated by the Chinese. I think its real.

DONALD TRUMP I did not. I did not. I do not say that.

HILLARY CLINTON I think science is real.

DONALD TRUMP I do not say that.

HILLARY CLINTON And I think its important that we grip this and deal with it, both at home and abroad. And heres what we can do. We can deploy a half a billion more solar panels. We can have enough clean energy to power every home. We can build a new modern electric grid. Thats a lot of jobs; thats a lot of new economic activity. So Ive tried to be very specific about what we can and should do, and I am determined that were going to get the economy really moving again, building on the progress weve made over the last eight years, but never going back to what got us in trouble in the first place.

MODERATOR Mr. Trump?

DONALD TRUMP She talks about solar panels. We invested in a solar company, our country. That was a disaster. They lost plenty of money on that one. Now, look, Im a great believer in all forms of energy, but were putting a lot of people out of work. Our energy policies are a disaster. Our country is losing so much in terms of energy, in terms of paying off our debt. You cant do what youre looking to do with \$20 trillion in debt. The Obama administration, from the time theyve come in, is over 230 years worth of debt, and hes topped it. Hes doubled it in a course of almost eight years, seven- and- a- half years, to be semi- exact. So I will tell you this. We have to do a much better job at keeping our jobs. And we have to do a much better job at giving companies incentives to build new companies or to expand, because theyre not doing it. And all you have to do is look at Michigan and look at Ohio and look at all of these places where so many of their jobs and their companies are just leaving, theyre gone. And, Hillary, Id just ask you this. Youve been doing this for

30 years. Why are you just thinking about these solutions right now? For 30 years, you've been doing it, and now you're just starting to think of solutions.

HILLARY CLINTON Well, actually...

DONALD TRUMP I will bring— excuse me. I will bring back jobs. You can't bring back jobs.

HILLARY CLINTON Well, actually, I have thought about this quite a bit.

DONALD TRUMP Yeah, for 30 years.

HILLARY CLINTON And I have— well, not quite that long. I think my husband did a pretty good job in the 1990s. I think a lot about what worked and how we can make it work again...

DONALD TRUMP Well, he approved NAFTA... [crosstalk]

HILLARY CLINTON ... million new jobs, a balanced budget...
