HILLARY CLINTON And actually— well, that was very interesting. First of all, China is illegally dumping steel in the United States and Donald Trump is buying it to build his buildings, putting steelworkers and American steel plants out of business. Thats something that I fought against as a senator and that I would have a trade prosecutor to make sure that we dont get taken advantage of by China on steel or anything else. You know, because it sounds like youre in the business or youre aware of people in the business— you know that we are now for the first time ever energy- independent. We are not dependent upon the Middle East. But the Middle East still controls a lot of the prices. So the price of oil has been way down. And that has had a damaging effect on a lot of the oil companies, right? We are, however, producing a lot of natural gas, which serves as a bridge to more renewable fuels. And I think thats an important transition. Weve got to remain energy-independent. It gives us much more power and freedom than to be worried about what goes on in the Middle East. We have enough worries over there without having to worry about that. So I have a comprehensive energy policy, but it really does include fighting climate change, because I think that is a serious problem. And I support moving toward more clean, renewable energy as quickly as we can, because I think we can be the 21st century clean energy superpower and create millions of new jobs and businesses. But I also want to be sure that we dont leave people behind. Thats why Im the only candidate from the very beginning of this campaign who had a plan to help us revitalize coal country, because those coal miners and their fathers and their grandfathers, they dug that coal out. A lot of them lost their lives. They were injured, but they turned the lights on and they powered our factories. I dont want to walk away from them. So weve got to do something for them.

MODERATOR Secretary Clinton. . .

HILLARY CLINTON But the price of coal is down worldwide. So we have to look at this comprehensively.

MODERATOR Your time is up.

HILLARY CLINTON And thats exactly what I have proposed. I hope you will go to [HillaryClinton.com](http://HillaryClinton.com) and look at my entire policy.

MODERATOR Time is up. We have time for one more. . . We have. . .
